Superstar in training.

Unique insight. Individual style. Personal strengths and needs. One child in a school full of every imaginable personality, approach and learning style. Schools need solutions that help ensure success on an individual student level. The accessibility features found in Microsoft® Windows® XP and Office XP help all students experience technology while helping schools find creative solutions to accessibility challenges.

The requirements of the No Child Left Behind Act and the guidelines outlined in Section 508 of the Rehabilitation Act of 1998 are asking schools to aim for new heights in accessible technology and empowered students. At Microsoft, our commitment to education means helping schools attain their goals with technology that is designed to meet the standards of today.

All students can learn. Every school can reach every child. Microsoft can help.

Check out our innovative solutions by ordering a free evaluation kit, including trial copies of Windows XP, Office XP and Microsoft Class Server, at: www.microsoft.com/education/?ID=InnovativeSolutions5

Deep Freeze
