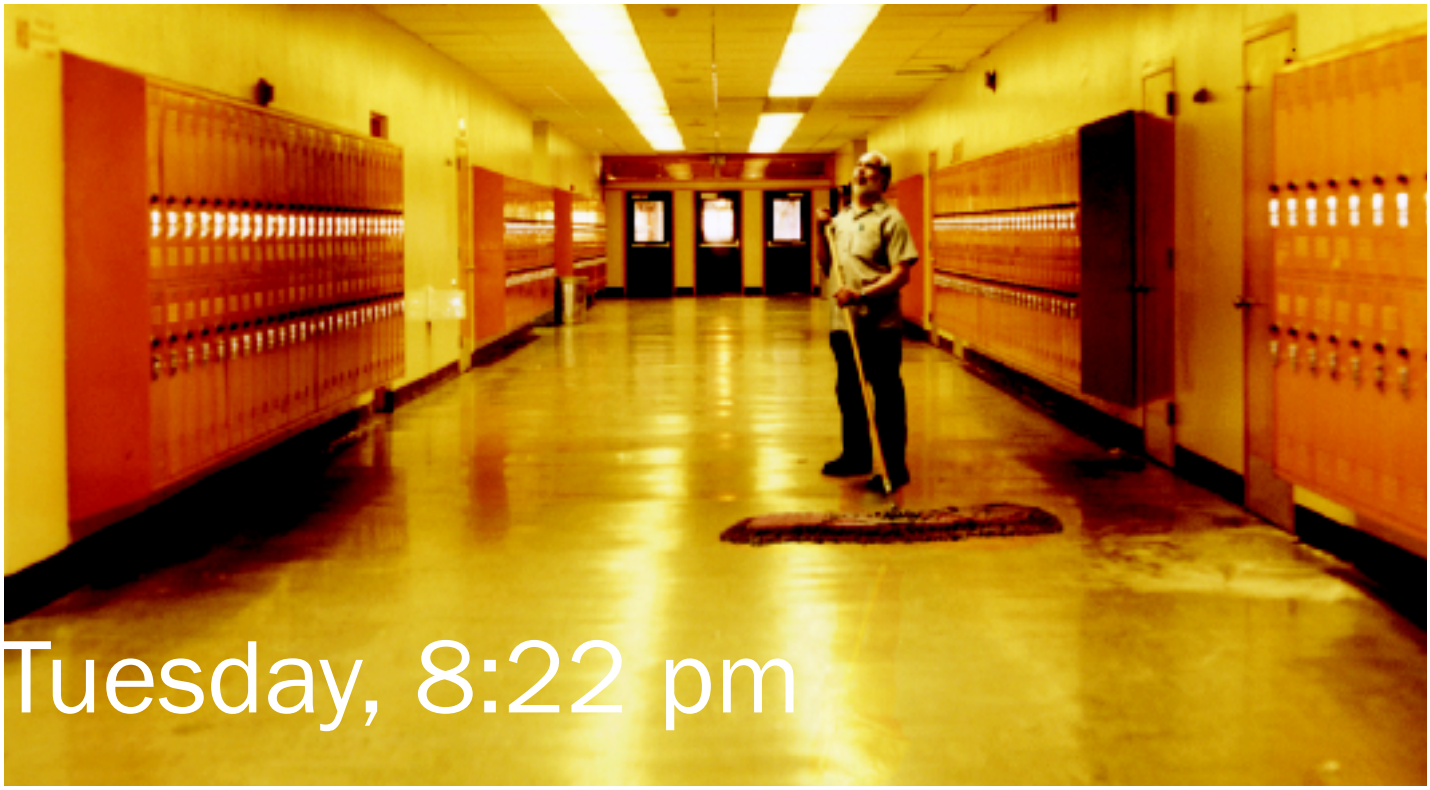
District Profiles



At the end of the day, it's just us and the janitor.

Help protect your school's most valuable information. Twenty-four hours a day. Seven days a week.

The last bell rings. Students bolt for the doors to meet up with friends and study for tomorrow's big test. Teachers head out to grade papers and prepare lesson plans. Soon, the school is empty except for the faithful janitor—and Microsoft®.

In today's technology-dependent world, security breaches are rampant. Unfortunately, even schools aren't off-limits. With a connected infrastructure from Microsoft that offers advanced security technology, your IT specialist has the ability to help make your school resistant to hackers and viruses. A Microsoft infrastructure will help protect student records, teachers' files, and administrative projects. So you'll worry less about security and can focus on what really matters – education.

Please visit our education security portal for special offers, a free evaluation kit, and important information on security in Education: **www.microsoft.com/education/?id=security**
