SECURITY

isn't just about
protecting your data...

It's about

PROTECTING

your students.

Integrated firewall and content filtering security – for an Internet you can trust.

SonicWALL Education Editions pack powerful protection for both your students and your network – at a budget-friendly price. Simple to install and use, they come complete with ICSA-certified firewalls as a first line of defense against hackers, as well as centrally managed content filtering to protect students from inappropriate web sites. Select models feature ViewPoint™ software for easy monitoring of bandwidth and Internet usage. Finally, an Internet for the innocent.

Get your **FREE** education literature package that includes case studies on how schools are successfully protecting their students and networks. Go to www.sonicwall-info.com/ed or call (888) 557-6642 today.

illuminating student information

Sun Microsystems in Education

Sun is a leading provider of open network computing solutions to colleges and universities around the world, powering academic, research and high performance computing systems, campus administration, digital libraries and student instructions systems. In addition, Sun is committed to connecting the world's students to the Internet, beginning with primary and secondary schools and extending to all levels of higher education. *For more information visit www.sun.com/edu.*

About eSIS™

AAL's eSIS is designed as a complete, Web based real-time information system for the tracking and management of student data from pre-kindergarten through grade 12 and into adult/ continuing education. This enterprise-wide system is engineered for optimal performance and ease of use by school districts, regional education agencies, application service providers and state departments of education.
